

Daniel Lusares Dalde

Full-Stack Developer — Web & Mobile

Minglanilla, Cebu, Philippines (Open to Remote) | +63 976 267 3719 | daldedaniellus@gmail.com

[Portfolio](#) | [GitLab](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years shipping production web platforms and cross-platform mobile apps. Specialized in PHP/CodeIgniter backends, React and Next.js frontends, and React Native (Expo) mobile development. Built and integrated real products across e-commerce, real estate, and maritime domains — including multi-gateway payments (PayPal, Stripe, Authorize.net, AsiaPay, Xendit), shipping and accounting APIs, and end-to-end mobile apps. Owns features independently while keeping code clean, performant, and well-integrated.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, C#

Frontend: React, Next.js, Tailwind CSS, Bootstrap, jQuery

Mobile: React Native, Expo, Expo Router, Nativewind

Backend & Databases: CodeIgniter, MySQL, REST APIs, Supabase

Cloud, DevOps & Tools: AWS S3, Firebase, Docker, Git, GitLab CI/CD, Figma

Integrations & APIs: PayPal, Stripe, Authorize.net, AsiaPay, Xendit, QuickBooks, ShipStation, UPS, DHL

PROFESSIONAL EXPERIENCE

Web Developer

Apr 2025 – Present

Humimic Medical / Clear Ballistics · Greenville, SC, USA · Remote

- Maintain and extend Clear Ballistics, a custom PHP e-commerce platform — shipping bug fixes, new features, and UI/UX improvements while keeping the site stable and secure.
- Support integrations across the full order lifecycle: multi-gateway payments (PayPal, Stripe, Authorize.net), UPS/DHL live shipping rates, QuickBooks accounting sync, ShipStation fulfillment, loyalty points, and campaign management.
- Manage the Humimic Medical WordPress site — theme customization, plugin management, and content updates.
- Optimize performance, SEO, and page-load speed across both platforms; manage version control and deployments with Git in collaboration with marketing and operations teams.

IT System Engineer

Jul 2024 – May 2025

Metrologyx Training and Assessment Center Inc. · Mandaue City, Cebu

- Created and managed company websites, ensuring usability, performance, and uptime.
- Developed and maintained automation systems on the Ignition SCADA platform; designed and troubleshoot SCADA/HMI systems and integrated them across IT/OT infrastructure.

WordPress Developer

Jan 2023 – May 2023

Metrologyx Institute of Technology · Minglanilla, Cebu

- Designed and built a responsive WordPress site showcasing courses, competencies, and institutional information.
- Applied SEO best practices to improve visibility for prospective students and trained staff on content management.

Graphic Artist

Aug 2023 – May 2025

Metrologyx Training and Assessment Center Inc. · Mandaue City, Cebu

- Produced marketing collateral, social media campaigns, and web/print deliverables while maintaining brand consistency.

Graphic Designer

Dec 2022 – Jul 2023

Contact Center Solution PH · Mandaue City, Cebu

- Designed social, print, and advertising creatives; developed branding assets and supported end-to-end campaign execution.

FREELANCE & CLIENT PROJECTS

Full-Stack Developer — Tokkatok

Jan 2026 – Apr 2026

Real Estate Marketplace (Client Project) · Remote · Philippines

- Built a full-stack real estate marketplace with role-based portals (admin, agent, owner, customer), subscription tiers, a booking system with availability calendars, and an AdminLTE admin panel.
- Integrated AsiaPay and Xendit payment gateways and AWS S3 media management.
- Developed the Customer App — a cross-platform React Native (Expo) app for browsing, saving, and booking properties, with real-time availability and Firebase push notifications.
- Developed the Owner App — a React Native app for staycation owners to manage listings, track bookings, sync calendars, upload galleries, and message guests.

Stack: PHP/Codelgniter, MySQL, React Native, Expo, TypeScript, Firebase, AWS S3

Full-Stack Developer — Beauty Buffet Holistica (BBH)

Dec 2025 – Apr 2026

E-commerce & Membership Platform (Client Project) · Remote · Philippines

- Built a full-stack MLM e-commerce and membership platform with tiered memberships (Customer, Prestige, Elite, Stockist), a multi-level commission engine, and downline genealogy tracking.
- Developed dual portals — a member dashboard for commission tracking, wallet, and rank progression, and an admin panel for orders, memberships, and commissions.
- Implemented USD/CAD multi-currency support, PayPal and manual payment flows, inventory management, and a background email queue.

Stack: PHP/Codelgniter, MySQL, Bootstrap, jQuery (AJAX)

Mobile Developer — SeaTrack PH

Personal / Open Source

Maritime Certificate Tracker · Remote · Philippines

- Built a React Native (Expo) app for Filipino seafarers to track maritime certificate expiry and receive smart renewal reminders, with a dashboard of alert levels, renewal guides, an accredited training-center finder, and Firebase push notifications. [Source](#)

Stack: React Native, Expo, TypeScript, Supabase, Firebase, Expo Router

EDUCATION

B.S. in Information Technology — Cum Laude

2020 – 2024

Asian College of Technology - IEF · Cebu City, Cebu

Senior High School — TVL / Maritime (With High Honors)

2018 – 2020

Rizwoods Colleges Inc. · Cebu City · Best in Research

CERTIFICATIONS

- Proficient PLC and HMI Programmer
