PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building production-grade web platforms and cross-platform mobile applications. Specialized in PHP/CodeIgniter backends, React/Next.js frontends, and React Native mobile apps. Proven track record delivering real products across e-commerce, real estate, and mobile — including multi-gateway payment integrations, third-party API connections, and end-to-end mobile app development. Adept at working independently on client projects while maintaining code quality, performance, and clean integrations.

TECHNICAL SKILLS

- **Languages:** C#, PHP, JavaScript, TypeScript
- **Frontend:** React, Next.js, Tailwind CSS, Bootstrap, jQuery
- **Mobile:** React Native, Expo, Nativewind
- **Backend & Database:** CodeIgniter, MySQL, REST APIs, AWS S3
- **Tools & Platforms:** Git, GitLab CI/CD, Firebase, Figma, ShipStation, QuickBooks API, PayPal API, Stripe, UPS API, DHL API

WORK EXPERIENCES

Company name : **Humimic Medical / Clear Ballistics**
Address : **110 Augusta Arbor Way Suite B Greenville, SC 29605**
Position : **Web Developer**
Inclusive dates : **April 2025 - Present**

- Maintain and enhance two company websites:
  - **Clear Ballistics:** Custom PHP website (bug fixes, new features, UI/UX improvements).
  - **Humimic Medical:** WordPress website (theme customization, plugin management, content updates).
- Implement front-end updates using HTML, CSS, JavaScript, and responsive design best practices.
- Optimize website performance, SEO, and page loading speed across both websites.
- Troubleshoot website issues, debug code, and ensure overall site stability and security.
- Collaborate with the marketing and operations teams to support new content, landing pages, and product updates.
- Manage version control and repository updates using Git.

Company name : **Metrologyx Training and Assessment Center Inc.**
Address : **4F Copenhagen East Residences, Mandaue City, Cebu 6014**
Position : **IT System Engineer**
Inclusive dates : **July 2024 - May 2025**

- Develop and maintain automation systems using the Ignition platform.
- Design and troubleshoot SCADA/HMI systems.
- Create and manage company websites, ensuring usability and performance.
- Collaborate with teams to integrate Ignition solutions with IT/OT infrastructure.
- Update and optimize website content and functionality.

Company name : **Metrologyx Training and Assessment Center Inc.**
Address : **4F Copenhagen East Residences, Mandaue City, Cebu 6014**
Position : **Graphic Artist**
Inclusive dates : **August 2023 - May 2025**

- Developed creative content for advertisements, brochures, tarps, and online campaigns.
- Assisted in conceptualizing creative content to promote productivity.
- Managed printed deliverables, signage, and website pages.
- Created and maintained marketing collateral materials.
- Developed and managed social media marketing programs.

Company name : **Metrologyx Institute of Technology**
Address : **Bayong, Cadulawan, Minglanilla, Philippines**
Position : **WordPress Developer**
Inclusive dates : **January 2023 - May 2023**

- Developed and designed a dynamic WordPress website to showcase Metrologyx Institute of Technology.
- Created an intuitive and visually engaging interface to highlight courses, competencies, and institutional information.
- Optimized the website for seamless navigation, responsiveness, and user engagement.
- Implemented SEO best practices to enhance online visibility and reach prospective students.
- Provided training and documentation to school staff for website content management and updates.

Company name : **Contact Center Solution PH**
Address : **4F Copenhagen East Residences, Mandaue City, Cebu 6014**
Position : **Graphic Designer**
Inclusive dates : **December 2022 - July 2023**

- Designed and created visual content for marketing materials, including social media graphics, brochures, banners, and advertisements.
- Developed branding assets and ensured consistency across all company materials.
- Collaborated with the marketing team to conceptualize and execute creative campaigns.
- Edited and enhanced images and videos to align with brand aesthetics.
- Managed and maintained the company's digital assets, ensuring easy accessibility and organization.
- Worked closely with clients and stakeholders to meet design requirements and deadlines.

Freelance & Side Projects

Company name : **Tokkatok - Client Project**
Address : **Remote · Philippines**
Position : **Full-Stack Developer**
Inclusive dates : **January 2026 - Present**

- Building Tokkatok — a full-stack real estate marketplace for the Philippines with role-based portals (admin, agent, owner, customer), subscription tiers, and an AdminLTE admin panel
- Integrated AsiaPay and Xendit payment gateways, AWS S3 for media management, and a booking system with availability calendars
- Developed Tokkatok Customer App — a cross-platform React Native (Expo) app for browsing, saving, and booking properties with Firebase push notifications and real-time availability
- Developed Tokkatok Owner App — a React Native app for staycation owners to manage listings, track bookings, sync calendars, upload gallery images, and message guests

Company name : **Beauty Buffet Holistica (BBH) - Client Project**
Address : **Remote · Philippines**
Position : **Full-Stack Developer**
Inclusive dates : **December 2026 - April 2026**

- Built BBH — a multi-variant e-commerce web platform with product browsing, cart, checkout, blog, and user account management
- Developed multiple homepage design variations and a custom admin panel for product and order management
- Built on CodeIgniter and Bootstrap with jQuery-driven AJAX interactions throughout
